KOKOSFLORA TECHNOLOGY

GROWSHIELD

With a decade of experience, we have profoundly understood and analyzed the growers' concerns and deployed the "GrowShield" technology which helps the crop to flourish and protect from external interferences. The technology focuses on minimizing the ionic constituents and protecting against weeds and pathogens which results in achieving a homogeneous and prolific root growth for maximum crop yields.

GROW SHIELD TECHNOLOGY

KOKOSFLORA COCO MATERIAL TYPES

Kokosflora provides a wide range of coco material types to fulfil the plant's growing requirements for increased yields.

KOKOSFLORA GROWSLABS

KOKOSFLORA Growslabs are the best choice for strawberries as they have the perfect sieve structure and particle size for better air circulation, which improves air permeability and leads to higher yields. The dimensions can be customised according to customer requirements.

Compressed (LxBxH)	Expanded(LxBxH)	Volume (L)
93 x 9.5 x 3cm	97 x 10 x 15cm	15L
97 x 9.5 x 3cm	100 x 10 x 16cm	16L
97 x 9.5 x 3.5cm	100 x 11 x 18cm	20L
97 x 9.5 x 4cm	100 x 11 x 21cm	24L

Note: The above values are only approximate

Normal
[EC < 3.0]
Unwashed

Basic
[EC < 0.8]
Washed

Deluxe
[EC < 0.8]
Buffered

pH
5.5 - 6.5

KOKOSFLORA GROWBAGS

KOKOSFLORA growbags are the optimal choice for strawberry cultivation thanks to the wide range of customisable mixes and sizes. We also use UV-treated bags with customisable planting and drainage holes. Customised sizes can be provided as required. Dimensions can be customised according to customer requirements.

Compressed (LxBxH)	Expanded(LxBxH)	Volume (L)
97 x 13 x 3cm	100 x 15 x 10cm	15L
97 x 16 x 3cm	100 x 18 x 10cm	18L
97 x 18 x 3cm	100 x 20 x 10cm	20L
97 x 18 x 4cm	100 x 20 x 12cm	24L

Note: The above values are only approximate

Withstands Multiple Crop Cycles

Normal [EC < 3.0] Unwashed

Basic [EC < 0.8] Washed

Deluxe [EC < 0.8] Buffered

pH 5.5 - 6.5

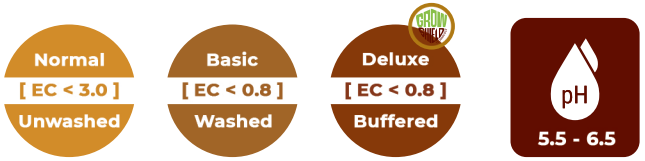

KOKOSFLORA 5KG BLOCKS & 650G BRICKS

KOKOSFLORA 5kg blocks and 650g briquettes are compressed with a perfect sieve structure and particle size to allow better air circulation, which improves air permeability and thus leads to higher yields. These blocks and briquettes are very suitable for refilling pots or trays, making your growing process easier and reducing growing costs.

Customised blends can be provided as required.

LOOSE SUBSTRATES FOR STRAWBERRIES & RASPBERRIES

KOKOSFLORA is a supplier of ready-made loose substrates that our customers can use to produce customised mixtures for substrate improvement. We offer various mixtures of coco raw materials that are customised to the needs of horticultural companies. These are washed sufficiently to remove water-soluble salts and other impurities and then matured extensively. KOKOSFLORA coco substrates are free from weeds, pesticides and other foreign substances - 100% biodegradable and environmentally friendly. Our range includes a wide variety of packaging from 25/50 litre bags to 1 MT jumbo bags.

Normal	Basic	Deluxe	Premium	pH
[EC < 3.0]	[EC < 0.8]	[EC < 0.8]	[EC < 3.0]	5.5 - 6.5
Unwashed	Washed	Buffered	Buffered + Washed	

KOKOSFLORA PREFILL - GROWBLOCKS FOR RASPBERRY

We highly recommend our raspberry growers a cost-effective cultivation mix that helps them maximize profits with the highest yields. Different mixtures and structures can be customized according to requirements.
